OHRPP IRB Submissions

The Office of Human Research Protection Program supports an internet-based software IRB electronic submission system to manage the submission, review, and approval of research projects involving human subjects. The electronic IRB submission system is designed to branch in response to information provided about the study procedures. The system requires an account that uses the single sign-on UCLA Logon ID credential.

BruinIRB: Submission and review of all active studies is managed in BruinIRB as of July 1, 2025. See BruinIRB Deployment FAQs for more information.

webIRB: Access to webIRB was deactivated for researchers as of 07/01/2025. Active studies have been migrated to the replacement BruinIRB application.

Please contact BruinIRB@research.ucla.edu with any questions.

Consult the BruinIRB Resource Library for quick guides, training videos, and other information.

For general questions, contact the OHRPP staff at 310-825-5344 or by email: Staff Directory | UCLA Office of the Human Research Protection Program

Before your study begins, you must have IRB approval. Below are the CTSI partner site IRB submission tools:

IRB Contacts for Partner Sites

-
- Cedars-Sinai
-
- Charles R. Drew University
-
- Lundquist/Harbor-UCLA
-
- UCLA

Cedars-Sinai – click here to go to the Cedars-Sinai Webridge IRB system. For more information, contact:

Office of Research Compliance and Quality Improvement
Cedars-Sinai Medical Center
8383 Wilshire Blvd., Suite 742
Beverly Hills, CA 90211
Phone: (310) 423-3783
Email: irb@cshs.org

Charles R. Drew University – Click here for more information on the IRB for Charles R. Drew University. If you have any questions regarding the IRB functions and review process, contact:

Office for the Protection of Human Subjects
Charles R. Drew University of Medicine and Science
1731 East 120th Street, Building F
Los Angeles, CA 90059
Phone: (323) 563-5990
Email: irb@cdrewu.edu

Junko Nishitani, CDU IRB Director
junkonishitani@cdrewu.edu
(323) 563-5990

Lundquist/Harbor-UCLA – Click here to go to the iRIS IRB System. You will need to log-in. For more information, contact:

Office of Compliance and Regulatory Affairs
Lundquist/Harbor-UCLA Medical Center
1124 West Carson St
Torrance, CA 90502
Phone: (310) 222-3624

View Lundquist/Harbor-UCLA workflow

UCLA – The online Institutional Review Board application system, webIRB, is available to all UCLA Investigators and Study Staff. For questions or assistance, contact:

Office of the Human Research Protection Program (OHRPP)
10889 Wilshire Blvd, Suite 830
Los Angeles, CA 90095-1406
Campus Mail Code: 140648

Email: North & South General Institutional Review Boards (GC-IRB)
Email: The Medical Institutional Review Boards 1,2, & 3 (M-IRB)

Training sessions are being held on the South campus and in the Kinross Building. Click here to schedule a training session.

To subscribe to the webIRB listserv: Send an e-mail to: webIRB-subscribe@lists.ucla.edu.
The subject line and body of the e-mail can be blank

The UCLA Institutional Biosafety Committee (IBC) is the local review body responsible for oversight of all research activities – including teaching laboratories – involving the use of hazardous biological material and recombinant or synthetic nucleic acids, as required and outlined in the NIH Guidelines and the BMBL. In order to maintain safe conditions and regulatory compliance in research and teaching areas, work done with any of the following biological materials must be registered with the IBC for review and authorization:

- Recombinant/synthetic nucleic acid molecules, as covered by the NIH Guidelines
- Infectious agents (viruses, bacteria, fungi, parasites, prions, etc.) that can cause disease in healthy humans and/or significant environmental or agricultural impacts, as covered by the BMBL
- Select agents and select toxins, as covered by the CDC DSAT regulations (See http://www.selectagents.gov/SelectAgentsandToxinsList.html)
- Human materials (including all fluids, tissues, excretions, secretions, or cell lines), as covered by the Cal/OSHA Bloodborne Pathogens Standard
- Nonhuman primate materials (including live animals, all fluids, tissues, excretions, secretions, or cell lines), as covered by the BMBL and Cal/OSHA Bloodborne Pathogen Standard
- Genetically-modified animals and whole plants, as covered by the NIH Guidelines
- Certain animals or animal specimens known to be reservoirs/vectors of zoonotic diseases. EXEMPT: Most animals from UCLA DLAM approved vendors. (See http://publichealth.lacounty.gov/vet/guides/vetzooman.htm for list of zoonotic animals)

It is the responsibility of the PI to obtain IBC approval for the safe handling, transport, use, and disposal of hazardous biological materials and recombinant/synthetic nucleic acids when these materials are used in research and teaching. All Biological Use Authorization (BUA) applications for IBC review are submitted using SafetyNet. All types of submissions, from benchwork to human gene transfer studies, use the same application smartform. Users access SafetyNet using their UCLA single sign-on credentials and should contact the IBC administrative team if access is not enabled.
