Overview/CITI Training Verification

All UCLA key personnel conducting human research are required to complete human subjects protection training through an online program called the Collaborative Institutional Training Initiative (CITI).

BruinIRB is UCLA's internet-based software application for the submission and review of research projects involving human subjects.

CITI Training Verification

UCLA OHRPP has created a CITI training lookup tool to search study team members and confirm any active and/or expired CITI trainings.

https://ohrpp.research.ucla.edu/citi-training/

Scroll down to the “CITI Training Lookup Tool” and click the hyperlink. Login with single sign on (either campus or mednet).

You can search the individual name(s) of the study team members you would like to validate CITI training.
