Investigational Pharmacy

All research studies utilizing investigational drugs will be reviewed by the Investigational Drug Pharmacist to determine scope of services required. In some cases, the IDS pharmacist may request additional study documents (i.e. pharmacy manual) or clarification of procedures before preparing a preliminary budget assessment. For questions, budget modifications or fee waivers, please contact the IDS pharmacist or email RxResearchMgt@mednet.ucla.edu.

For price quotes on commercial drugs used in a study, please complete the Commercial Drug Pricing Application form in CAFÉ. For information on how to complete the application as well as the billing process, please click here.

- Application (in CAFÉ): click here
- Instructions for using CAFÉ: click here

Please view video link here to access pharmacy training for study coordinator personnel.
