IND Development Overview

Confused about the need to file an IND? Think your study may be exempt? Not sure where to start? You are not alone. ResearchGo provides information, templates and resources to guide you through the IND process.

An academic researcher may be required to submit an IND application to the FDA in order to study a marketed medical product in a new (i.e. unapproved) clinical indication. An investigator is always required to hold an IND to study an unmarketed (i.e. unapproved) medical product. In both cases, the products are considered "investigational" by FDA. The vast majority of INDs on file with the FDA are for noncommercial research.

This toolkit (adapted from The Institute of Translational Health Sciences) helps you navigate each step of the IND process by providing guidance and templates relevant to each step. The information provided focuses on INDs for studies of marketed medical products for new indications.

Please review the latest FDA guidance for determining the need for an IND and information for Mobile Medical Apps. For additional information on submitting INDs for unmarketed medical products, review of your IND submission, or need assistance, please contact the CTSI Office of FDA Affairs.

Last updated: 24 May 2017

The Pre-IND Process

Review the five requirements below to determine if your study qualifies for exemption from an IND (21 CFR 312.2).

Still not sure? Start with the IND Decision Tool. Pay particular attention to requirement #3. The FDA Draft Guidance Investigational New Drug Applications (INDs) – Determining Whether Human Research Studies Can Be Conducted without an IND provides more detail on a range of issues, including the process for consulting with FDA.

If you think a pre-IND meeting is warranted please contact ResearchGo for assistance. Templates for a meeting request letter and pre-IND briefing packet are provided below. In addition, please consult with
the IRB to determine whether a formal letter from FDA is required to document the waiver.

- IND Exemption Letter
- Pre-IND Consultation Contact List
- Request for Pre-IND Meeting
- Pre-IND Briefing Packet
- Types of Meetings with the FDA

**IND Exemptions**

A drug that is lawfully marketed in the United States is exempt from the requirements for an IND if all of the following apply:

- The investigation is not intended to be reported to the FDA in support of a new indication for use or any other significant change in the labeling for the drug.
- The investigation is not intended to support a significant change in the advertising for a prescription drug product.
- The investigation does not involve a change in route of administration, dosage level, or patient population, or other factor that significantly increases the risks (or decreases the acceptability of the risks) associated with use of the drug product.
- The investigation is conducted in compliance with the requirements for IRB review (21 CFR 56) and informed consent (21 CFR 50).
- The drug may not be represented as safe or effective for the purposes for which it is under investigation, nor may it be commercially distributed or sold.

For additional information about whether or not an IND is required for a cancer therapy drug you must contact the [NCI Regulatory Affairs Branch](https://www.cancer.gov/nci-regulatory-affairs).

Need assistance or have regulatory questions? Please contact the [CTSI Office of FDA Affairs](https://www.ctsi.ucla.edu/).

Prepare the Initial IND Submission

The IND Sponsor-Investigator compiles information in three broad areas:

- **Animal Pharmacology and Toxicology Studies**: Preclinical data used to assess whether the product is reasonably safe for studies in humans. For studies of marketed drugs in new indications, this section might contain data from animal models supporting the utility of the drug in the new indication.

- **Manufacturing Information**: The composition, stability, and controls used for manufacturing the drug substance and the drug product.
  - For marketed drugs, the FDA already has this information on file in the manufacturer’s Drug Master File (DMF). For unmarketed drugs, the Investigator-Sponsor can request a Letter of Authorization (LOA) from the manufacturer to cross-reference the Drug Master File or existing IND if there is one. Although it is not required, the LOA is recommended.
  - For legally marketed drugs, the information in the product label or package insert might suffice for the manufacturing information.

- **Clinical Protocols and Investigator Brochures**: A detailed clinical study protocol, and Investigator Brochure are required sections of an IND application. The Investigator Brochure is primarily needed for multi-center studies and is a summary of information needed by participating investigators to assess the safety of the investigational product. For approved medications, a copy of the Prescribing Information may be used in place of an Investigator Brochure.

The IND Sponsor-Investigator writes the IND in the format of IND Application Template. The initial IND submission should be accompanied by a cover letter, an **IND Application Form - FDA 1571** (see instructions) and a ClinicalTrials.Gov **Certification of Compliance - FDA 3674**. (All forms optimized for Safari)

The IND Sponsor-Investigator must also submit a **Statement of Investigator - FDA Form FDA 1572** (see instructions). This form is a formal contract with FDA to adhere to Informed Consent, IRB review, and general IND regulations.

Need assistance or have regulatory questions? Please contact the **CTSI Office of FDA Affairs**.

Last updated: 26 Sep 2016
1. The initial IND submission should be accompanied by a cover letter, a Form FDA 1571 (see instructions) and a ClinicalTrials.Gov Certification of Compliance - FDA 3674. (All forms optimized for Safari)
2. All must be submitted in triplicate (an original and two photocopies):
3. The IND Sponsor-Investigator completes, signs, and dates the Form FDA 1571.
4. The IND Sponsor-Investigator assembles the signed submission and makes three photocopies and one PDF of the original documents.

*Please Note: Academic Institutions are not required to submit electronically. However, if you would like to submit electronically, please see the following contacts and guidance.

- Questions and general information regarding the preparation of submissions in electronic format may be directed to CDER at esub@fda.hhs.gov or CBER at esubprep@cber.fda.gov. Questions regarding submission of datasets to CDER may be sent to edata@fda.hhs.gov.
- Please visit the Electronic Common Technical Document (eCTD) web page to access a wide variety of resources and support regarding eCTD submissions.

For an initial submission, the IND Sponsor-Investigator sends the original and two photocopies to the appropriate address via overnight courier. Keep one copy of the submission packet as well as a photocopy of the courier airbill.

**For a Drug:**

Food and Drug Administration  
Center for Drug Evaluation and Research  
Central Document Room  
5901-B Ammendale Rd.  
Beltsville, MD. 20705-1266

**For a Therapeutic Biological Product:**

Food and Drug Administration  
Center for Drug Evaluation and Research  
Therapeutic Biological Products Document Room  
5901-B Ammendale Rd.  
Beltsville, MD. 20705-1266

On the delivery date, track the shipment on the courier website for confirmation of delivery. Print the delivery confirmation and file it with the copy of the submission packet, which is kept in an IND Binder.

The FDA responds to the initial submission of a new IND with a letter, acknowledging receipt of the submission and assigning the IND number. The sponsor must wait 30 calendar days before initiating any clinical trials. During this time, FDA has an opportunity to review the IND for safety to assure that research subjects will not be subjected to unreasonable risk. If there are no issues, the IND generally goes into effect 30 days after the Date of Receipt shown in this letter. It is advised that you obtain written confirmation (email or fax) that the FDA review has been completed and that the Study May Proceed. Please upload FDA Study May Proceed confirmation in WebIRB under other study documents.

The IND Acknowledgement letter also provides the mailing address for all subsequent submissions to the IND.

Need assistance or have regulatory questions? Please contact the CTSI Office of FDA Affairs.

Maintain the IND

To maintain an IND, the Sponsor-Investigator has three reporting responsibilities. Each type of report is time-sensitive and has a specific structure. The first two, Protocol Amendments and Safety Reports, are submitted when needed to report updated or unforeseen circumstances. The third type, the Annual Report, is submitted every year, even when no studies are in progress under the IND. Send all submissions to the address provided in the IND Acknowledgement letter received in response to the initial submission.

IND Protocol Amendments
Once an IND is in effect, the IND Sponsor-Investigator is responsible to amend it as needed to ensure that the clinical investigations are conducted according to protocols included in the application. An IND Protocol Amendment should have an IND Amendment Cover Letter and is a submission to an existing IND notifying the FDA of one or more of the following:

- New study protocol
- Change in an existing study protocol
- New investigator
- Transfer of IND Obligations

IND Annual Reports
An IND Annual Report requires a cover letter and is a brief report of the progress of studies conducted under an IND, due annually to the FDA within 60 days of the anniversary of the date that the IND went into effect.

IND Safety Reports
An IND Safety Report is expedited, written notification to the FDA of an adverse experience associated with the use of a study drug that is both serious and unexpected. “Associated with the use of the drug” is a Code of Federal Regulations term meaning “There is a reasonable possibility that the experience may have been caused by the drug.” An IND Safety Report consists of a MedWatch Form and a cover letter. It is due to the FDA within 15 calendar days of initial receipt of the SAE Report.

Need assistance or have regulatory questions? Please contact the CTSI Office of FDA Affairs.
